RESPONSE TO RESTRICTION REQUIREMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

In response to the Restriction Requirement mailed February 9, 2000, Applicants hereby elect Group I, Claims 70-80, 84 and 89, drawn to a receptor, a polynucleotide encoding the receptor, a vector, a host cell, and a method of compound screening, with traverse.

Although the five claim groups set forth by the Examiner are patentably distinct, they contain overlapping subject matter (SEQ ID NO: 2). Therefore, a proper search of Group I would necessarily reveal references directed to Groups II-IV. In addition, the Group III claims (85 and 90) depend on Claims 84 and 89, respectively, which are in Group I. Thus, Group III should not be separated from Group I.

M.P.E.P. §803 states, in part, that "if the search and examination of an entire application can be made without serious burden, the examiner must examine it on the merits, even though it includes claims to independent or distinct inventions." In the present case, Applicants submit that examination of all pending claims would not place such a burden on the Examiner.

Applicants are aware that the Examiner is not bound by findings in the PCT application from which the present application entered the U.S. national phase. However, in the PCT case,

Filed : November 12, 1998

69 claims were filed and no lack of unity objection was raised. In the present case, these 69 claims were condensed to 20 claims which cover less subject matter than the original claims. Accordingly, Applicants submit that the restriction is improper and respectfully request that it be withdrawn.

Please charge any additional fees, including any fees for additional extension of time, or credit overpayment to Deposit Account No. 11-1410. A duplicate copy of this sheet is enclosed.

Respectfully submitted,
